

DID YOU KNOW SALES TIPS From DSC®

DSC Provides Free End User Downloading Software

You can now offer FREE System Administrator software to your customers for the New Power Series and Maxsys Series control panels. Using a TL250 Internet Communicator, a customer can easily connect to his/her security system (via the internet or local network) and manage users, view the event history and perform various types of functions. A MD-12 Modem is also available if connection via a telephone line is needed. Security is never a concern since DLS2002SA is fully password protected and encrypted.

DLS2002SA System Administrator can:

- Arm/Disarm/Bypass
- View System Status (Zone Status, Partition Status, Arm/Alarm Status, etc)
- Activate Outputs
- View Event History
- Print, Save, and Export all data
- Change Schedules
- Program User Codes

To download this FREE software, go to www.dsc.com. Log in to the password protected area using your DSC Website Username and Password. Select [Products], then [Software], finally [DSC/DLS]. Using the drop down menu, select [DLS2002 SA]. To install the software, download and run these four (4) selected files in this order:

1. DLS_2002SA_Engine_Only_Setup.exe
2. DLS_2002SA_SP2 (Service Pack).exe
3. DLS2002 TL-250 Driver.exe
4. If you're using a PC1864 control panel, install the DLS2002SA PC1864 v4.1 Driver.exe; or, if you're using a PC1832 control panel, install the DLS2002SA PC1832 v4.1 Driver.exe; or, if you're using a PC1616 control panel, install the DLS2002SA PC1616 v4.1 Driver.exe; or, if you're using a Maxsys control panel, install the DLS_2002SA_PC4020_V3.5.exe.

A full DLS2002 user training PowerPoint presentation is available for download under the protected area of www.dsc.com. Click on [Resources], then [Power Point Presentations].
